## Interesting papers 4

Ecological processes dominate risk of extinction in small populations, not genetics ([Wootton & Pfister 2013](#)).

Understanding the importance of environment requires we that don't miss important environmental variables ([Chang et al 2013](#)).

Oikos has relatively high proportion of papers that address theory ([Scheiner 2013](#)).

Parasite roles in food webs closely related to taxonomy ([Poulin et al 2013](#)).

High impact papers often combine exist ideas in novel ways ([Uzzi et al 2013](#)).

Coevolution reduces effects of climate change when species interests conflict (and the opposite) ([Northfield & Ives, 2013](#)).

How to predict community responses to perturbations ([Aufderheide et al 2013](#)).

Removing parasites increases host resistance, perhaps due to pleiotropy ([Dargent et al 2013](#)).
