Interesting papers 5

Not too many, or too few, ant species for highest crop yield, please ([Wielgoss et al, 2013](#)).

Pike – trout coexistence depends on lake size and temperature ([Hein et al, 2013](#)).

Not such a sunny outlook for early warning signals of regime shifts ([Boettiger et al 2013](#)).
([And the special issue.](#))

Disease threat more frequent in high extinction threat IUCN red list categories ([Heard et al, 2013](#)).

Trees manage their investment in mutualisms ([Pringle et al, 2013](#)).

Accidental experiments in ecology and evolution ([HilleRisLambers et al, 2013](#)).

Plant-herbivore interactions variously altered by temperature ([Lemoine et al, 2013](#)).

Robustness of ecological networks overestimated if some types of interactions are ignored ([Bewick et al, 2013](#)).

Contact networks related to parasite prevalence, only for faecal-oral transmitted parasites ([Gear et al, 2013](#)).
